

# Download Cerebrovascular Ultrasound And Stroke Management

A stroke is a medical condition in which poor blood flow to the brain results in cell death. There are two main types of stroke: ischemic, due to lack of blood flow, and hemorrhagic, due to bleeding. Both result in parts of the brain not functioning properly. Signs and symptoms of a stroke may include an inability to move or feel on one side of the body, problems understanding or speaking ...We would like to show you a description here but the site won't allow us. A stroke is a medical emergency. Quick treatment is needed. Call 911 or your local emergency number right away or seek urgent medical care at the first signs of a stroke.{{configCtrl2.info.metaDescription}} INTRODUCTION. Blunt carotid and vertebral artery injuries, collectively termed blunt cerebrovascular injury, are uncommon but potentially devastating events.
