Table 2, based on the Army's 77 BCT program, shows the changes in terms of Army battalions. The Army's decision to increase the number of maneuver companies in its modular heavy BCT battalions from three to four makes it necessary to consider the number of combat maneuver companies as well as the number of battalions. A railgun is a device that uses electromagnetic force to launch high velocity projectiles, by means of a sliding armature that is accelerated along a pair of conductive rails. It is typically constructed as a weapon, and the projectile normally does not contain explosives, instead relying on the projectile's high speed to inflict damage.
