Narcissistic personality disorder (NPD) is a personality disorder with a long-term pattern of abnormal behavior characterized by exaggerated feelings of self-importance, excessive need for admiration, and a lack of empathy. Those affected often spend much time thinking about achieving power or success, or on their appearance. They often take advantage of the people around them. Political Implications of the Chain of Being The fear of "disorder" was not merely philosophical--it had significant political ramifications. Historical development. Political economy is a very old subject of intellectual inquiry but a relatively young academic discipline. The analysis of political economy (in terms of the nature of state and market relations), both in practical terms and as moral philosophy, has been traced to Greek philosophers such as Plato and Aristotle as well as to the Scholastics and those who propounded a ... The insanity defense, also known as the mental disorder defense, is an affirmative defense by excuse in a criminal case, arguing that the defendant is not responsible for his or her actions due to an episodic or persistent psychiatric disease at the time of the criminal act. This is contrasted with an excuse of provocation, in which defendant is responsible, but the responsibility is lessened ...
