

Download Engineer S Notebook Integrated Circuit Applications

An application-specific integrated circuit (ASIC / ? e? s ? k /) is an integrated circuit (IC) customized for a particular use, rather than intended for general-purpose use. Vishay's Applications gateway is divided into major market segments. Each of these has a list of end products and circuit functions that provide access to tables with technical specifications and datasheet links for key components. The 555 timer IC is an integrated circuit (chip) used in a variety of timer, pulse generation, and oscillator applications. The 555 can be used to provide time delays, as an oscillator, and as a flip-flop element. ON Semiconductor has the expertise, products, platforms and complete solutions to help you create smart, connected, energy efficient devices, and get them to market faster., Engineer S Notebook Integrated Circuit Applications.
