

Download Forest Fire Prevention And Control

Grass fires are a major concern for firefighters in early spring; they get quickly out of control and can cause serious damage in agricultural and forested lands. North Carolina's forest land is one of the greatest influences on the state, providing economic value and adding immeasurably to the quality of life for its residents. February 1, 2019 This aerial view of a home burning on Graham Sherron Rd in Granville County early Saturday morning is provided by WRAL Sky 5. Engine #4 and Tanker #2 responded mutual aid to assist the Brassfield Fire Department with this large fire. A wildfire or wildland fire is a fire in an area of combustible vegetation occurring in rural areas. Depending on the type of vegetation present, a wildfire can also be classified more specifically as a brush fire, bushfire, desert fire, forest fire, grass fire, hill fire, peat fire, vegetation fire, and veld fire.. Fossil charcoal indicates that wildfires began soon after the appearance of ...
