

Download How To Set The Clock On Ihome Radio

In 2005 SDI Technologies launched iHome, which now offers full lines of alarm clocks, clock radios and other products catered to iPod owners. While the iHome is not one...The display screen displays the current hour. To set the minutes, press the Sleep or Minute Set button. For some models, these buttons do not exist. In such cases, press the Select UP/FF or Select Down/Rew button until the screen displays the correct time. Press the Clock Adjust or Time Set button to confirm the time setting on the clock. Listen for two beeps or wait for the display screen to stop blinking; this confirms the setting of the clock time.The iHome iPL23 alarm clock offers some neat features for tech enthusiasts. On top of FM radio and alarm capabilities, it also offers you the ability to charge and play music from your iPhone.My room's radio is a newer version, but your article saved me nonetheless. There is a plastic bar across the back of the device. I tried moving it, thinking it might be the thumbscrew mentioned in your post. It moved a few inches, and the "clock set" button was hidden behind the bar., How To Set The Clock On Ihome Radio.
