

Download Integrated Transport Modeling Sustainable Cities

Integrated Transport and Land Use Modeling for Sustainable Cities Enlarge... Directed by Michel Bierlaire , André de Palma , Ricardo Hurtubia and Paul Waddell More Sustainable development is a goal of planners and politicians and ever more prominent for urban areas where development agglomerates. The SustainCity consortium further developed the methodology and tools for integrated modelling and analysis of land use transport systems. The IVT implemented MoreAgile modeling: adapting UrbanSim to the European context using the Open Platform for Urban Simulation (Paul Waddell, Liming Wang, Hana Ševčíková, and Alan Borning), 17. Integration of agent-based transport and land use models (Thomas W. Nicolai, Kai Nagel), 18. Integrated transport and land use models are an increasingly used tool for evaluation of urban policy and large scale projects. Although there is a well-built theoretical background supporting the ..., Integrated Transport Modeling Sustainable Cities.
