Biotechnology Engineer, Polymer Manufacturing Engineer, Pharmaceutical Manufacturing Engineer, Research and Development Engineer, Quality Consulting Engineer, Manufacturing Production Engineer, Food Process Engineer, Petrochemicals Engineer, Consultant

JSTOR is a digital library of academic journals, books, and primary sources.

By Debra Humphreys A college education is expensive. While it is clearly worth the investment—and even worth going into at least some debt to achieve—students need to know that not all college degree programs are equal; not all are designed to prepare them for long-term success. According to the U.S. Department of Education’s Federal Student Aid office, there is more than \$150 billion in federal financial aid available to college students, including graduate students attending accredited online colleges.,
