

Download Protea Book Guide Cultivated Proteaceae

The flowering plants, also known as angiosperms, Angiospermae or Magnoliophyta, are the most diverse group of land plants, with 64 orders, 416 families, approximately 13,164 known genera and c. 369,000 known species. Like gymnosperms, angiosperms are seed-producing plants. quarrei: for Paul Quarré (1904-1980), Belgian botanist and plant collector in the Congo, commemorated with *Hyparrhenia quarrei*, the former taxon *Cassia quarrei* (now synonymized to *Chamaecrista stricta*) and possibly also for the former taxon *Ceropegia quarrei*, now *C. stenantha*. The name "South Africa" is derived from the country's geographic location at the southern tip of Africa. Upon formation, the country was named the Union of South Africa in English, reflecting its origin from the unification of four formerly separate British colonies. Talbotia: for William Henry Fox Talbot (1800-1877), British linguist, member of parliament, author, botanist and plant collector, inventor, translator of Assyrian texts, and Fellow of both the Linnean and Royal Societies., Protea Book Guide Cultivated Proteaceae.
