

Download Rule Of 72 Personal Finance Chart Answers

The rule of 72 is a method used in finance to quickly estimate the doubling or halving time through compound interest or inflation, respectively. For example, using the rule of 72, an investor who invests \$1,000 at an interest rate of 4% per year, will double their money in approximately 18 years. The Rule of 72 is defined as a shortcut or rule of thumb used to estimate the number of years required to double your money at a given annual rate of return, and vice versa. FinanceInTheClassroom.org RULE OF 72 KEY 1. Doug invested \$2,500 into a Certificate of Deposit earning 6.5% interest. How long will it take to double Doug's investment?
