

# Download Solution And Solubility Curve Review Answers

A solution of potassium chlorate,  $\text{KClO}_3$ , has 20 grams of the salt dissolved in 100 grams of water at  $70^\circ\text{C}$ . Approximately how many more grams of the salt can be added to the solution before reaching the saturation point? Think of a solvent as a type of liquid that dissolves another liquid to form a solution. When mixed together, numerous solvents combine to form gasoline. Read 10 answers by scientists with 18 recommendations from their colleagues to the question asked by S M Majedul Karim on Sep 2, 2014.
